

KOSMOS INNOVATION CENTER

INVESTING IN THE FUTURE, ONE ENTREPRENEUR AT A TIME

KIC CENTER OF EXCELLENCE - KUMASI

— OUR SPECIALISTS MAKERS CENTERS —

ABOUT US

KOSMOS INNOVATION CENTER (KIC) has established a Center of Excellence in **Ejisu, Kumasi**, as part of efforts to promote accessibility of maker centers for young start-ups and entrepreneurs within the country and sub-region, as they develop innovative solutions to support the agricultural and agri-adjacent sectors. The Center bridges the gap between innovation and commercialization, providing practical support that enables ideas to become viable products, businesses and jobs.

The **KIC CENTER OF EXCELLENCE - KUMASI** is a multi-disciplinary innovation and prototyping hub designed to support the development of practical, market-ready solutions, particularly within agriculture, manufacturing, engineering, construction, IT, energy, extractive and related sectors.

The KIC Center Of Excellence - Kumasi is aimed at empowering young entrepreneurs in Ghana to develop innovative solutions for the agricultural sector. The KIC Center Of Excellence - Kumasi comprises specialized maker centers designed to facilitate the development of agricultural technologies and innovations. These centers will be instrumental in transforming ideas into tangible, market-ready solutions.

The KIC Center Of Excellence - Kumasi has been set up with support from the Mastercard Foundation to bring many young people into work, through entrepreneurship.

CORE FACILITIES

- Food Innovation Lab
- Electronics & Mechatronics Lab
- **Computer-Aided Design (CAD) Lab**
- Metal Fabrication Workshop
- **Woodwork & Fabrication Unit**
- Workforce Development

KEY SERVICES

- **Product design and prototyping**
- Fabrication and technical services
- **Food product development and testing**
- Technical training and skills development
- **Startup incubation and enterprise support**
